

FIG.1

FIG. 1 is a perspective view of a shoe sole assembly 10 in a first configuration. The sole assembly 10 includes a sole body 12 having a first surface 14 and a second surface 16. The sole body 12 is elongated and tapers at both ends. The sole body 12 is formed of a material having a first layer 14 and a second layer 16. The first layer 14 is a thin, flexible layer. The second layer 16 is a thicker, more rigid layer. The sole body 12 is shown in a perspective view, with the first surface 14 facing the viewer and the second surface 16 facing away. The sole body 12 is shown in a first configuration, which is a flat, elongated shape. The sole body 12 is shown in a perspective view, with the first surface 14 facing the viewer and the second surface 16 facing away. The sole body 12 is shown in a first configuration, which is a flat, elongated shape.
